香薰美顏班

Beauty essential oils are an emerging trend in skin care. While an abundance of beauty products can be seen on the shelves, their beautifying effects may differ greatly due to different ingredients.

During this workshop, the secret contained in these skin care bottles will be revealed to answer thought-provoking questions such as: Why is our skin always unstable? Why do we have fat deposits under our eyes? How do you make the skin firmer through facial massage?

Members will get to know more about the ingredients, texture and skin care benefits of several precious organic vegetable oils, as well as natural aromatherapy essential oils. Whether you need whitening, moisturizing, enhance skin elasticity or resistance to sensitivity, you can create your own natural beauty essence oil and learn practical facial massage techniques most suitable for your skin condition.
